CARBON FILTERS

Carbon filters work best with a humidity of less than 70%. Over 80% RH they don't work at all.

Fresh filters are effective for 6-12 months, MountainAir filters are effective for up to 3 years.

WATER PURIFYING EQUIPMENT

AQUARIOPURE Reverse osmosis unit - As we all know, our East Anglian water is very hard. Poor water quality can lead to a loss of crop yield. This problem can be overcome by the use of reverse osmosis (the passage of mains water through a special membrane). This machine is easy to install & maintain & can produce up to 190 litres of pure water in 24 hours. £150
 AQUAZONE supplies ozone to liquids. Kills all known pathogens and oxygenates. £99

Please Note:- The world of Hydroponics and indoor growing is a vast and ever expanding market. Our price list is based on products that are reliable and popular with our customers. If you cannot find the products and equipment you require within our list then we will do our best to obtain them for you. We make no bogus price promises like some of our more expensive competitors but of course we want your business and can usually beat a cheaper price if one has slipped under our radar! This price list is updated regularly and we suggest that you check if a newer edition is available when you visit the shop.

AND FINALLY.....

GET HIGH!

Try our recipe for 'Rocket Fuel' and watch your plants take off!
